

Environmental Good Governance:

Rule of law entry points for climate change and environmental capital

Gaythri Raman

Laws exist but are they effective in protecting our environment?

LEGAL INNOVATION

- **Judicial capacity building for effective enforcement**
- **Global forums for knowledge-sharing between relevant stakeholders**
- **Innovative approaches seen in South America in recognizing the Colombian Amazon and Paraná Delta as “subject of rights”**
- **Ensuring access to justice**

RESPONSIBLE CORPORATE CITIZENSHIP

- **Greater transparency through a comprehensive database of policies and legislation for stakeholders**
- **Uniform global green certification programs and standards**
- **Accountability and transparency by MNCs on adherence to environmental policies**
